

The point was also made in the DVD that it is through the power of His might that all things are held together. How? With proteins that are called “laminin”. This definition is given by Wikipedia: “Laminins are a family of proteins that are an integral part of the structural scaffolding of basement membranes in almost every animal tissue.” Yes! Laminins are the protein that literally holds everything together! They are called adhesion molecules, and every cell of every living thing is held together by their “glue”. Without them, our cells would fall apart!

Hebrews 1:1-4 says of our Lord: “*God... has in these last days spoken to us by His Son, whom He has appointed heir of all things, through whom also He made the worlds; who being the brightness of His glory and the express image of His person, and upholding all things by the word of His power, when He had by Himself purged our sins, sat down at the right hand of the Majesty on high, having become so much better than the angels, as He has by inheritance obtained a more excellent name than they.*”

A very impressive video [Secret Worlds: The Universe Within] begins with viewing the Milky from a distance of 10 million light years from the earth, proceeds to move through space

A scientific drawing and analysis of laminin.

closer and closer to the earth, and focusses finally on an oak tree. The focus narrows to a leaf, then moves into a study of the cells of the leaf. One cannot help but be impressed with both the greatness/power of the Creator, and with His minute attention to every microscopic detail of every thing He has made! **And yet, His ultimate love and focus are on HUMANS!** How great and merciful is our God!

Bible Correspondence Course

Presented by the Church of Christ

Because of the discoveries of science, we understand many things about the Universe, the Earth, and even our own bodies that we could not have known without the tireless studies of these intelligent people. The observation is made:

“If we are to get a day and a night out of twenty-four hours of rotation, the Earth must make a complete rotation once in each twenty-four hour period. Earth is some 24,000 miles in circumference at the equator. To get those 24,000 miles all the way around in twenty-four hours, every point and every person on the equator must be moving at 1,000 miles per hour!

“...And our day-night rotation is the small part of our cosmic travels. To get through a year in 365 days, the Earth moves around the Sun at 20 miles per second. And the entire solar system, us included, is hurtling around the center of our galaxy, the Milky Way, at ten times that speed.... Can you feel any of this?” (**The Science of God** by Gerald L. Schroeder)

Consider this: True science is actually an intense and ever-expanding study of the mind and works of God!

Of course the “Darwinian Theory of Evolution” is a hoax, and so are countless other things that “science” has pronounced. Paul warned Timothy, “...*avoiding profane and vain babblings, and oppositions of science [knowledge which is] falsely so called*” (1 Timothy 6:20). So we must not accept as true every statement made in the name of science; we must be on

guard and believe nothing that is a contradiction of plain teachings in God’s Word.

Ever will it be, to those of us who have lived as God’s children — to those of us who believe — that we will see God as the cause and beginning of all things. Whatever wonders science may explain, to us God is the bottom line. These marvels exist because they were first *conceived in His mind*, and then *they were brought into physical existence through the power of His Word*.

And through those scientific discoveries that are true, what marvels we learn about our God!

It blows my mind even to think that this earth which seems absolutely still — not a twig moving on a tree — is actually spinning a thousand miles an hour! And that it is thrusting itself forward in an orbit around the sun at the rate of 72,000 miles per hour! And that the solar system as a unit is hurling around within the Milky Way 720,000 miles an hour! And scientists are sure that even the whole Milky Way is also moving through space! Yet we feel none of this!

If it is true — and it seems to be true — What a BEING! What a POWER! What an INTELLIGENCE! What an ETERNAL ONE!

While extremely intelligent scientists are struggling to unravel the mysteries of matter, space and time; while they glory in each small step of

progress in identifying the existence of a thing, and perhaps guessing at what it does, wondering just how it does what it does, and missing so many points that must wait until perhaps years or ages later to be laboriously learned — while scientists do all of these things — God serenely watches their efforts and discoveries from His glorious throne. He conceived the marvel they are studying, with all its intricacies, with its depth of mysteries; He put it in place; He has sustained its existence and its continued working through the ages of time.

He watches and waits, and surely He smiles because humans are learning something of His mind and of His power in their desire to know the world around them!

Truly, “*The heavens declare the glory of God; And the firmament shows His handiwork. Day unto day utters speech, and night unto night reveals knowledge*” (Psalm 19:1,2).

In DVD sermons by Louie Giglio [**Indescribable; How Great Is our God!**], points were made about the hugeness of the universe God spoke into being, and that the same God knitted our human bodies together with every amazing inter working part, just as David, by inspiration had written in Psalm 139:14-18. Knowing these things, how can anyone deny the existence of our Creator?
